                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 58201, Application PC/TUS0209107B

Sequence 58201, Application PC/TUS0209107B

GENERAL INFORMATION:

APPLICANT: Elitra Pharmaceuticals Inc.

TITLE OF INVENTION: Identification of Essential Genes in Microorganisms

FILE REFERENCE: ELITRA.0347PC

CURRENT APPLICATION NUMBER: PCT/US02/09107B

CURRENT FILING DATE: 2001-03-03-12

PRIOR FILING DATE: 2001-03-21

PRIOR APPLICATION NUMBER: 09/948,993

PRIOR APPLICATION NUMBER: 60/342,923

PRIOR FILING DATE: 2001-10-25

PRIOR FILING DATE: 2001-10-26

PRIOR FILING DATE: 2002-08

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 101,
